

Scenario description

After the Axis retreat from Africa the US insisted on a landing in northern France instead of invading Italy. The 7th Army was transferred to England to conduct the Landings. A number of Air groups has also been transferred from Africa to England to support the landings.

Air Marshal Harris (who disliked the Halifax) got all Heavy Bomber production switched to Lancaster's.

Base Scenario: The 4th Supreme Command

Some other changes have been made, some for easier playing, some just to see how it plays out.

This is an allied only scenario, as the allied ai still try's to land in Sicily.

If the invasion target is changed, the prep points for amphib's and paratroopers are retained. You can change the invasion target and still invade on turn 1.

Changes done

All:

- Change Low lvl Camera to 14.000 feet and High lvl Camera to 34.000 feet.
