

Mohamar's Madness

Surgical Strike (Libya)

When ready for sea, get underway and proceed to the vicinity of the Libyan coast. Remain in international waters and maintain continuous communications. You are assigned as a unit of a strike force that will be assigned specific targets ashore.

The Tomahawks in your vertical launch tubes will be sufficient for the targets for which you will be responsible.

Peacetime rules of engagement apply prior to the coordinated strike launch.

ADM Paul Grace

Commander, US Sixth Fleet
