

Let My People Go!

Use of Special Operations Forces (SOF) for Non-Combatant Evacuation Operations (NEO) (Colombia)

When ready for sea and with SEAL team embarked, get underway and proceed to the Colombian coast.

Your primary mission will be to support special forces employment to recover US citizens being held hostage on Colombian soil by an extremist group. It is unlikely that the complete special forces mission profile will remain covert.

Therefore, resistance by land, sea, and air forces should be anticipated. Weapons loadout should take into consideration the variety of platforms that may be encountered. Upon arrival in the assigned area, copy the broadcast for the latest intelligence summary and for specific tasking for both the SEAL team and the ship.

ADM Mel Davey
Commander, US Second Fleet
