

Fidel's Folly

Harbor Penetration for the Destruction of a Cargo Ship (Cuba)

When ready for sea, get underway and proceed to international waters south of Cuba.

You will conduct surveillance and, if necessary, ASUW operations.

Cargo ships are believed to be transporting weapons of mass destruction in violation of the Nuclear Non-Proliferation Treaty.

Should the President so direct, you will be tasked with the location and destruction of vessels in violation of the treaty. Intelligence and tasking messages will be sent as soon as possible. Optimize your weapons loadout for ASUW operations against merchants and small combatants.

Commander, US Second Fleet
