

Oscar-Winning Performance

Battle Group Support/ASW (Yellow Sea)

When ready for sea, get underway and proceed to the southern Yellow Sea for ASW operations in support of a US carrier battle group.

Intelligence estimates are that a nuclear cruise missile submarine (SSGN) acquired from the former Soviet Union will be deployed by a third world nation to oppose the carrier group operating in the region to provide stability.

Upon arrival, copy the submarine broadcast for intelligence updates, rules of engagement (ROE), and specific tasking. Your weapon loadout should be optimized for ASW.

ADM Kim Castro
Commander, US Seventh Fleet
