

## Canada

Two Canadian F/A-18 squadrons would deploy to airfield Lahr in West-Germany. the 416 Tactical Fighter Squadron stationed in Cold Lake, Canada. And the 433 Tactical Fighter Squadron, stationed in Bagotville Canada. Canada had 2x Boeing 707 aircraft which could be used for transport of personnel and air-to-air refueling based at Trenton Airbase.

There are two Canada .INST versions. One before the RETURN FORCES to GERMANY (REFORGER) action and one where it has already taken place. You can choose to do de logistical ferry or not.

Other Canadian airfields along the East coast will be crucial to the USAF aircraft to refuel before crossing the ocean towards Europe.

I incorporated the Canadian army air defense units in W Germany already at their Brigade units. You can change this at your own discretion.

**Note:** The 1<sup>st</sup> Canadian Infantry Division was re-activated in April 1988. The only forward-deployed unit is the 4th Canadian Mech Brigade Group in Lahr, FRG. In wartime, the other two brigades along with 1st Division HQ and supporting units would be deployed to Germany. Canada maintains 7 days of war stocks.
