

France

Mirage IV, France nuclear bomber and recce aircraft.ⁱ

Because of the distance from the frontline I made the French airfields single-unit airfields.. Sorry, but the amount of units is growing out of proportions. France was not formally a part of NATO but did some promises...to help... [NORTHAG](#) would have been reinforced by the French [III Corps](#) and [the Force d'Action Rapide](#) in the event of hostilities. ⁱⁱ

[CENTAG](#) would have been reinforced by the French [I Corps](#) and [II Corps](#) in the event of hostilities. ⁱⁱⁱ

It already had ground and helicopter units in- and close to Germany. ^{iv} But had withdrawn its Nike Hercules and Hawk air defenses already in the end of the '60's. So practically no air defense...

So it is up to you to incorporate the French or not. if there are additions please let it know.

Mirage F1C & Matra Super 530F^v

French Navy

The navy had their aircraft carriers and I put one fleet west of France. The rest is work for later.^{vi}
