

Empire Version 5.0 and Age of Steel V2.0 December 2025

Installation - New Install

1. Make a duplicate copy of your standard game.
2. Install the **extended art of the map** or use the **super extended map** from my One Drive:

[WITP AE Empire Mods and Art New Updates 190126 - OneDrive](#)

Password is Empire1941

3. Put the **scenario files** into the **SCEN folder** of your installation.

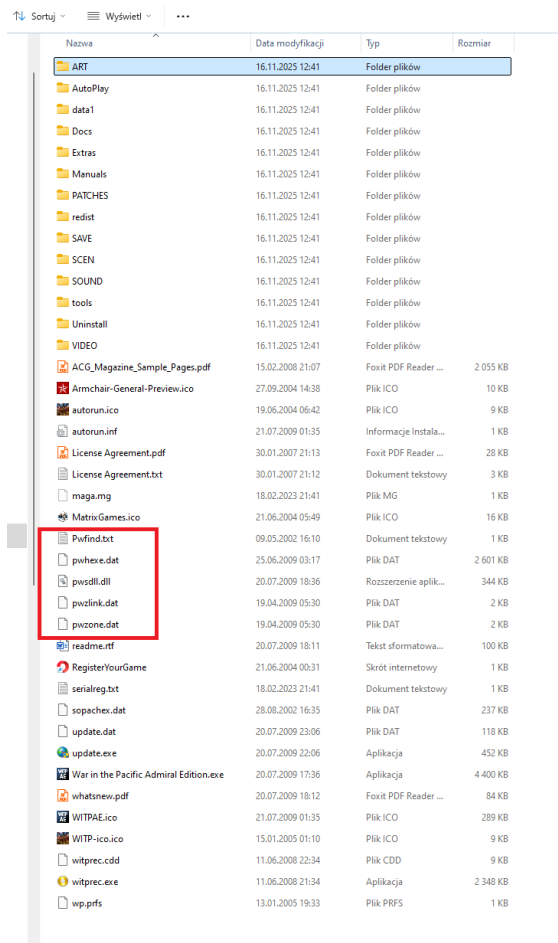

They are 42-45 and 50/51 (should not overwrite as these slots have not been used before).

[WITP AE Empire Mods and Art New Updates 190126 - OneDrive](#)

4. For new games, put the art folders into the **ART folder** and allow overwriting.

5. Use the **Admin Files** with pwhex etc. file and other files if you need them.

You are your opponent and must use the same **pwhexe** file in the **main folder** of the game.

6. Important! Updating the files in the ART folder.

For existing games. Delete the **8 folders** and **6 plane tiles** shown in the picture below, and then unpack ALL the new art into **your ART folder**.

[WITP AE Empire Mods and Art New Updates 190126 - OneDrive](#)

Important: delete the folders indicated; the other files can just be overwritten
