

This a test on why the two man OPs are not seeing any enemy vehicles. I may be doing the test wrong or find out it was me making a mistake on setting up the OPs.

First the scenario condition: 0400 hrs with Light Precipitation, Visual 500m. Dawn will be at 0549.

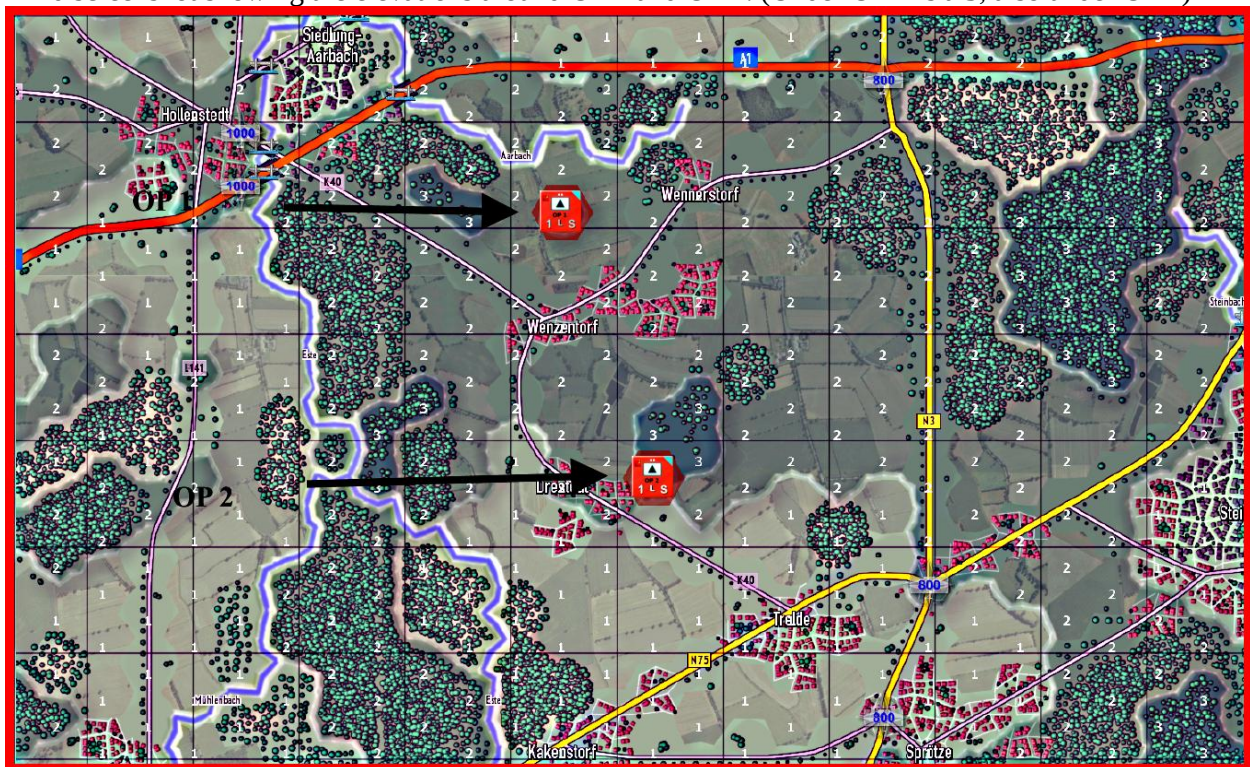

First screenshot showing the LOS from OP 1.

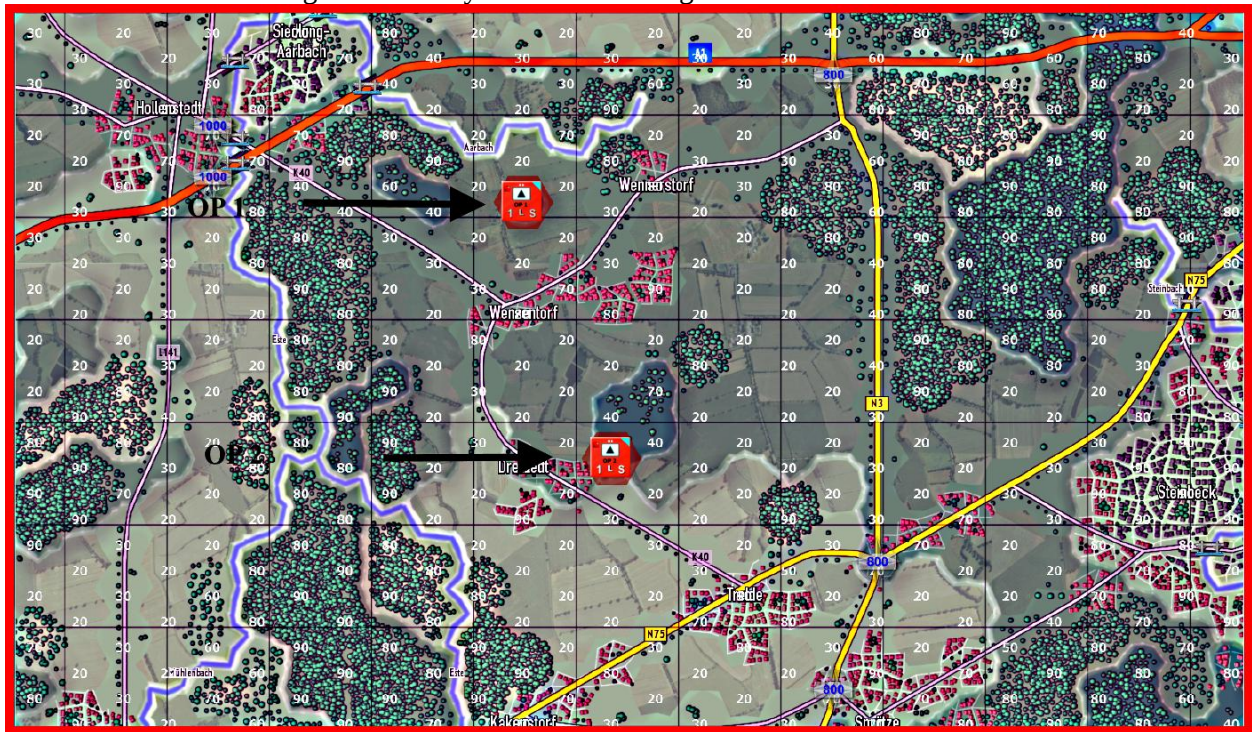

Second screenshot showing LOS from OP 2.

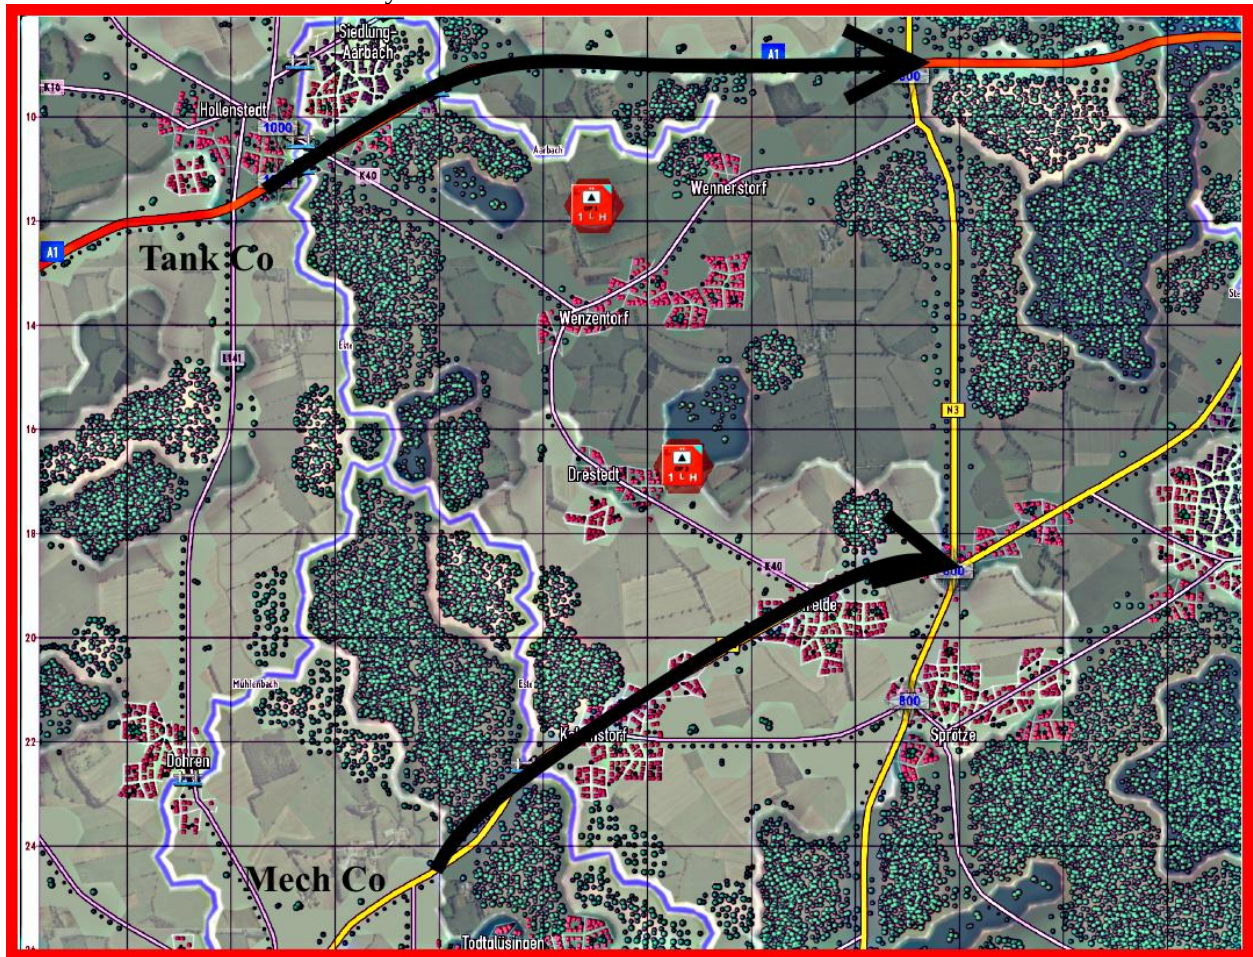

Third screenshot showing the elevations around OP 1 and OP 2. (Under OP 1 is a 3, also under OP 2)

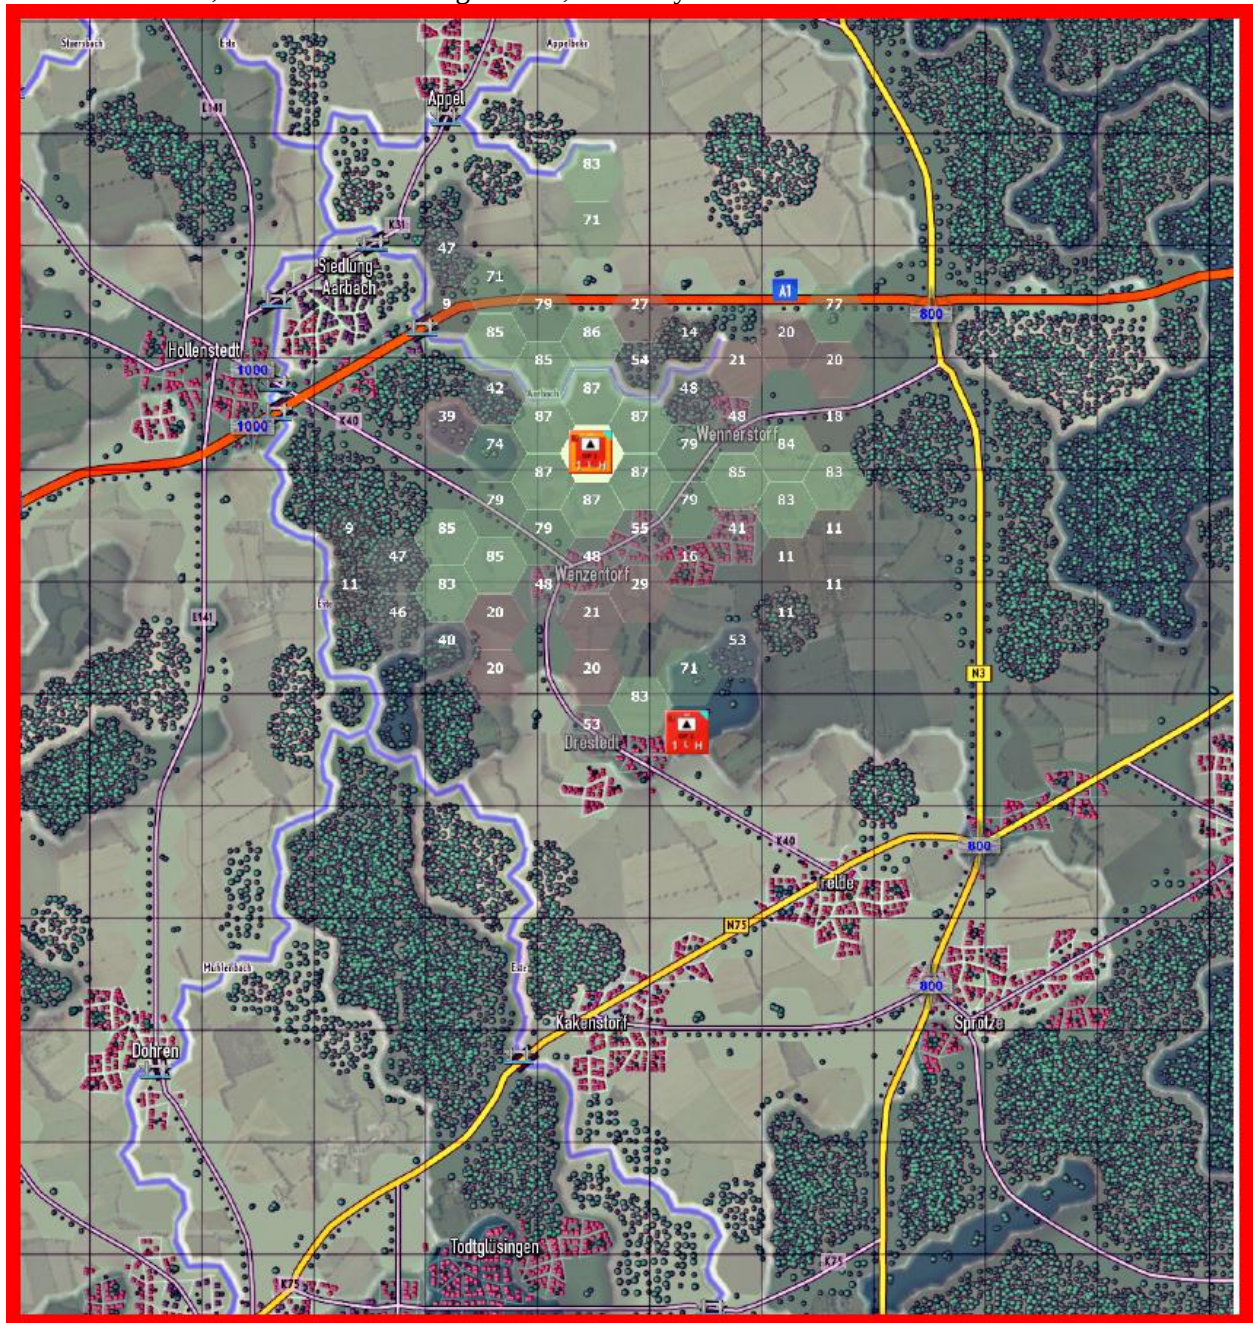

Fourth screenshot showing the Visibility Hindrance Rating.

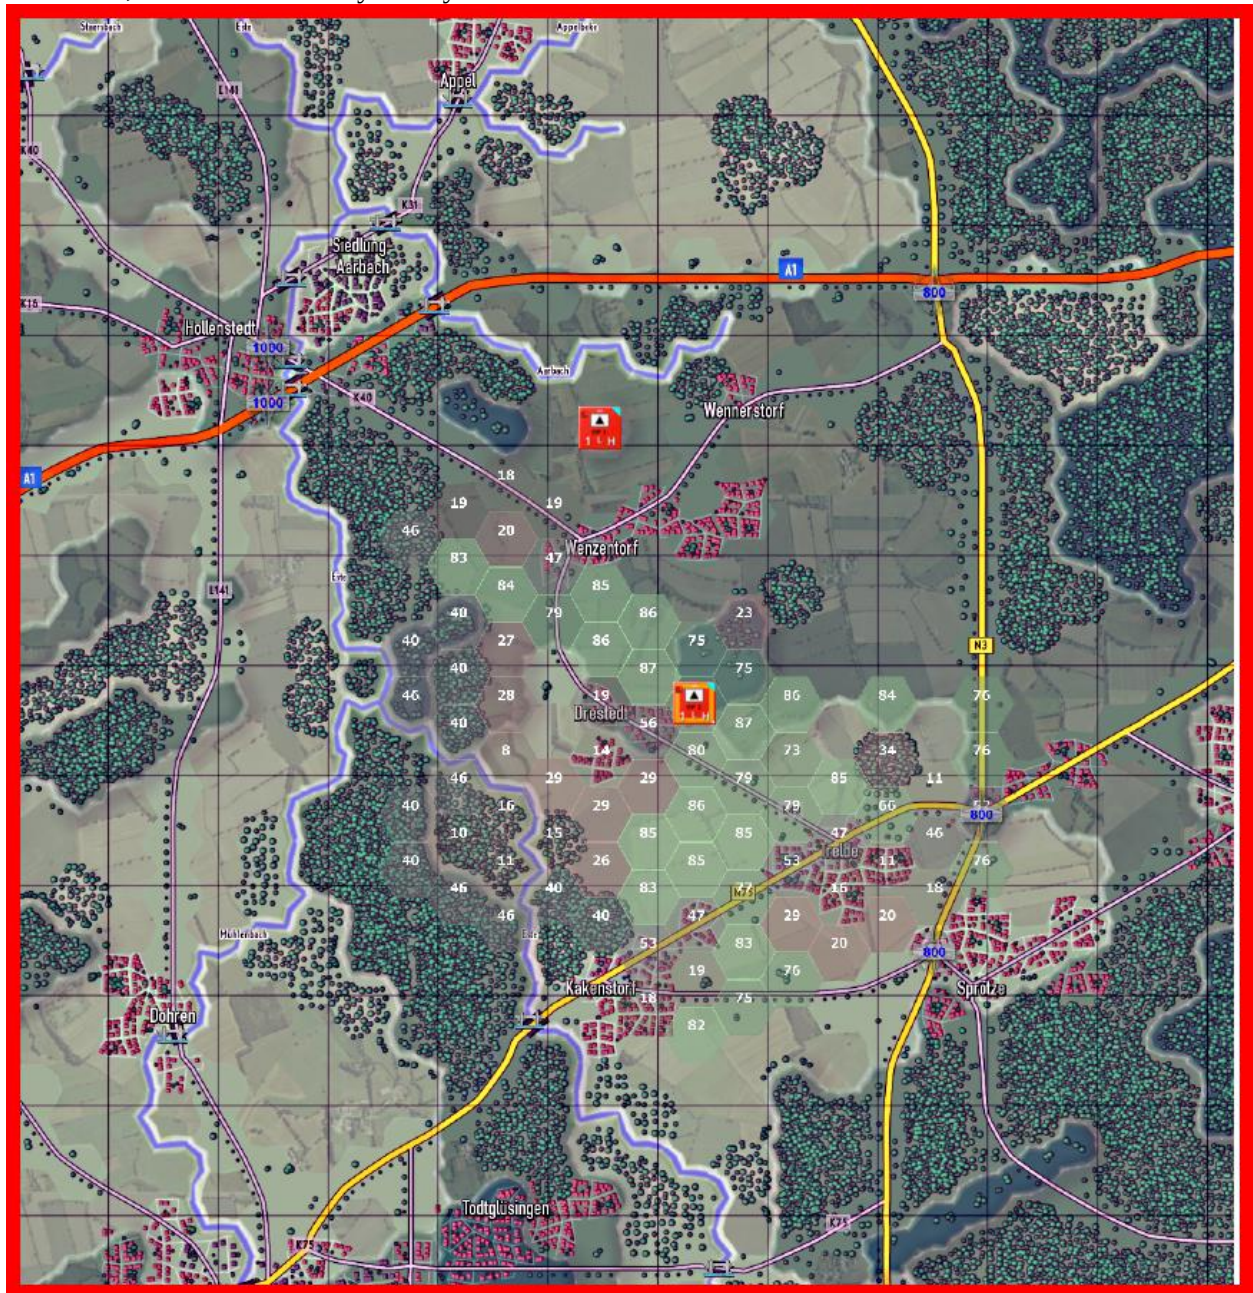

Fifth screenshot shows the enemy routes for the test.

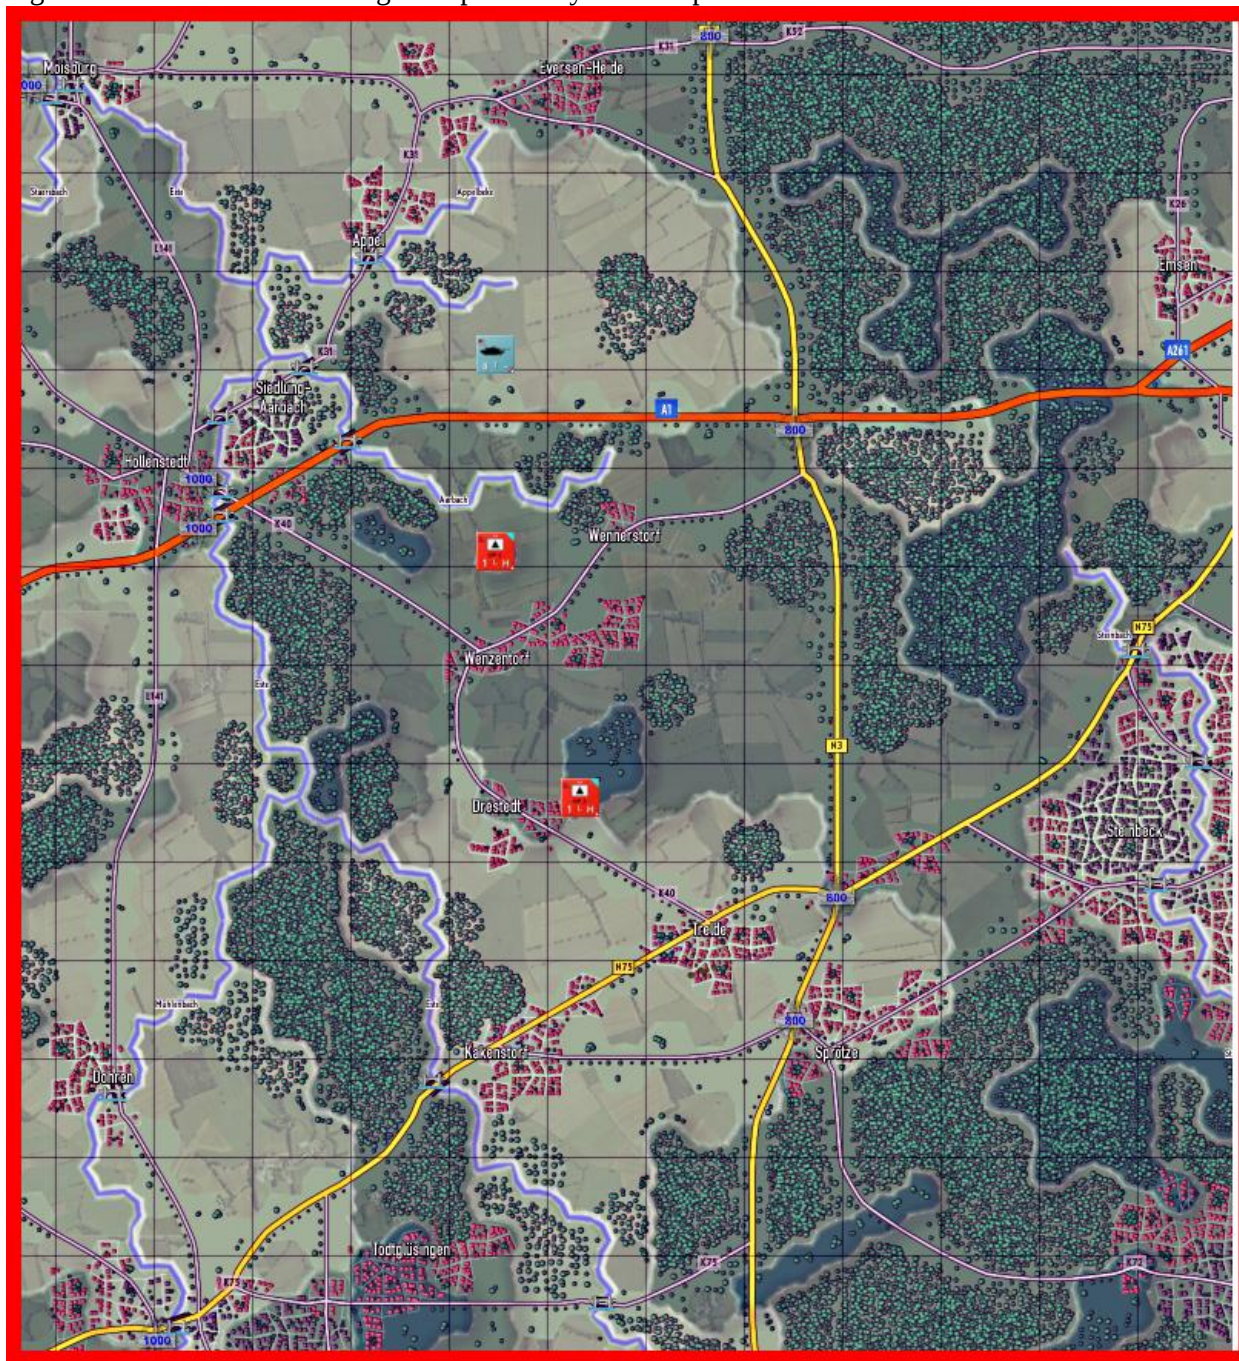

LOS OP1 at 0500, Weather: Haze / Fog / Dawn, Visibility: 2000 meters.

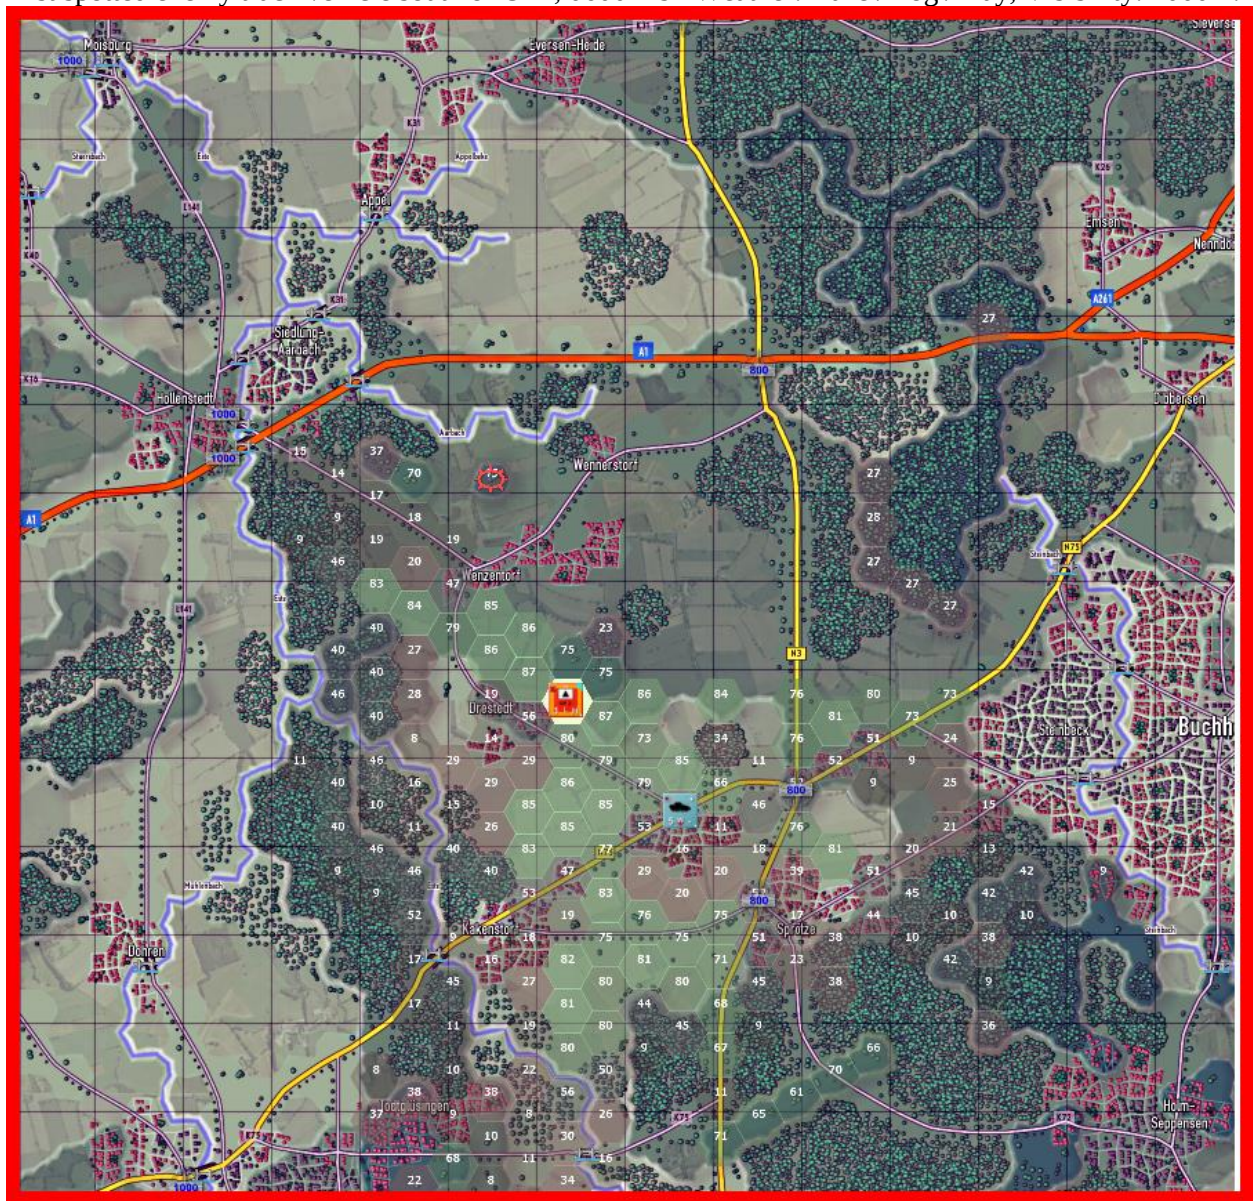

LOS OP2 at 0540 hrs - Weather: Haze / Fog / Dawn, Visibility: 2500 meters. As you can see from the screenshot, still can not see any enemy vehicles.

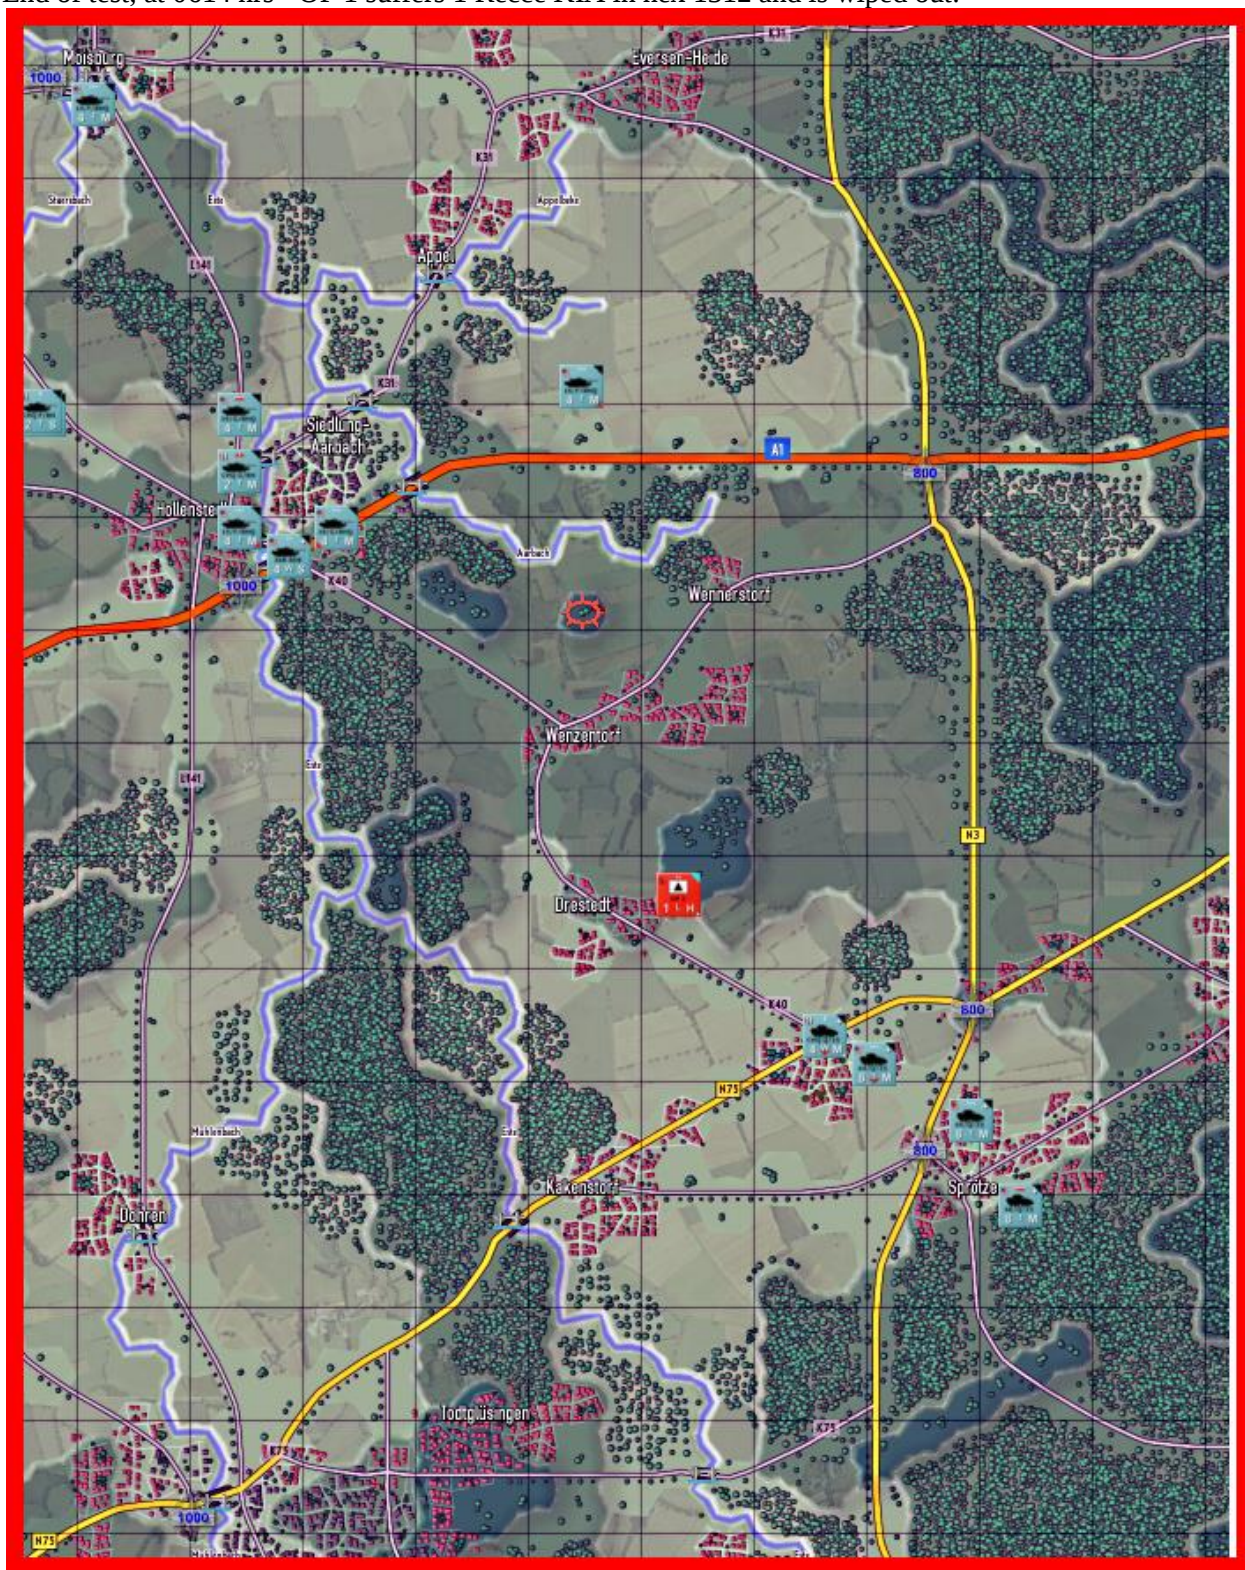

First spotted enemy tank north of OP1, 0600 hrs - Weather: Haze / Fog / Day, Visibility: 2000 meters.
Right after this screenshot OP1 gets wiped out by the tank platoon north of OP1.

First spotted enemy track vehicle south of OP2, 0600 hrs - Weather: Haze / Fog / Day, Visibility: 2000m.

End of test, at 0614 hrs - OP 1 suffers 1 Recce KIA in hex 1312 and is wiped out.

As you can see from the south, the enemy Mech Co seem to have skirt the southern edge of the LOS of OP2. The Northern Tank Co was supposed to follow the main road but seem to only send one tank platoon east of the river.

Time and Weather Reports:

0430 hrs - Weather: Heavy Rain / Night, Visibility: 500 meters.

0435 hrs - Weather: Light Rain / Night, Visibility: 500 meters.

0445 hrs - Weather: Clear / Night, Visibility: 500 meters.

0450 hrs - Weather: Haze / Fog / Dawn, Visibility: 2500 meters.

0500 hrs - Weather: Haze / Fog / Dawn, Visibility: 2000 meters.

0540 hrs - Weather: Haze / Fog / Dawn, Visibility: 2500 meters.

0550 hrs - Weather: Haze / Fog / Day, Visibility: 1500 meters.

0600 hrs - Weather: Haze / Fog / Day, Visibility: 2000 meters.
